

EMERGENCY LANDING POINTS / SAFE HAVENS

These are the landing points where a dragon boat can make landfall in an emergency:

- medical emergency, i.e. cardiac arrest, major bleeding, any medical or health related issues requiring immediate medical attention or evacuation
- boat is sinking, i.e. boat taking on water from a leak at a rapid rate and cannot be arrested

Note that at all the landing points except for Kallang Riverside Park (Nursery Beach), the Team will be required to seek the respective facility/station person on duty for help. Describe the nature of the emergency and what kind of help and assistance is required.

Teams with own boats are advised to have at least one (1) 3m long rope that can be used to tie-up their boat to the pontoon located at these facilities/stations.

Teams headed to Kallang Riverside Park (Nursery Beach) may beach their boat. At this location, onus on the Team to call for ambulance on their own accord as this site is a public space and there are no person on duty at Nursery.
